1. The township of ZLATNA, with a population of about 5,000 with another 2,000 inhabitants approximately in the small neighbouring villages, is administratively subordinated to nearby ALPA IULIA. Its status as a township due to the large sulphuric acid plant within its boundaries and in spite of the relatively small number of inhabitants it possesses a bank as well as a law court.
2. Following are the locations of the principal institutions in town:
 - a. The local council (SPATUL POPULAR COMUNAL) on the main road at the corner of VALEA MORILOR Street, in a large groundfloor building which also houses the local Party and UTM (youth organisation) with the entrance to the local council from VALEA MORILOR Street.
 - b. The MILITIA, with a staff of six policemen - in a small building on a street parallel to the main road. There is no fire brigade in the town nor was fire fighting equipment seen.
 - c. The law court - in an old groundfloor building on the left-hand side of VALEA MORILOR Street, coming from the direction of the main road.
 - d. The State Bank branch - in VALEA MORILOR Street, in a pre-war groundfloor building opposite the law court.
 - e. The post, telegraph and telephone offices - on the right-hand side of VALEA MORILOR street coming from the direction of the main road, in an old groundfloor building.
 - f. A branch of the Forestry Institute (FILIALA INSTITUTULUI DE SILVICULTURA) - on the main road, adjoining the orthodox church.
3. A transformer is to be found in the eastern part of the town near the road leading to ALPA IULIA, in the open field without a covering structure.
4. There is an industrial plant in the eastern part of town adjoining the narrow-gauge railway station, producing the sulphuric acid, CuSO₄, and ZnO₂ from pyrites mined north-west of town. This is an old pre-war plant to which

halls for the production of the sulphuric acid were added after the war. A railway line comes up to the yard and the ore reaches the enterprise by means of the narrow-gauge train.

5. The railway station is situated in the eastern part of town which a narrow-gauge train connects with ALBA IULIA, while the line leading westward is not for passengers but for transporting the ore to the a/m chemical plant as well as timber from the forests to the broad-gauge railway in ALBA IULIA.
6. The elementary school occupies an old groundfloor building on the left-hand side of the main road when coming from the direction of ALBA IULIA, opposite the orthodox church.
7. There is a secondary school on the main road in a one-storey building adjacent to the local council. The House of Culture, a big groundfloor structure with a large hall, is situated on the right-hand side of VALEA MORILOR street when coming from the direction of the main road, a short distance from the Catholic church.
8. The following medical institutions are situated in town:
 - a. A hospital with about 40 beds, on the right-hand side of VALEA MORILOR street when coming from the direction of the main road, in a groundfloor building containing surgical and internal diseases' wards, with four doctors in attendance.
 - b. A children's clinic with ten beds, on the main road opposite V. MORILOR Street, in a two-storey building which also includes a ten-bed maternity ward as well as the local branch office of the health authorities (CIRCUMSCRIPTIA SANITARA).
 - c. A dispensary for tubercular patients (DISPENSAIR TBC) - in an old groundfloor building on the right-hand side of the main road when coming from the direction of ALBA IULIA.
9. A large air raid shelter was dug into a hill in the north-western part of town, at the site of archeological excavations. The entrance to the shelter is from VALEA MORILOR Street.
10. New living quarters for the chemical plant workers were built in 1955 (?) in the vicinity of the main road in the section called VALEA VECANA, on the north side of the road.
